TRY TO DISCOVER EFFECT OF RADIUM

Health Bureau Makes Study of Factory Workers.

Washington, D. C.—Studies to determine the effects upon workers of exposure to radium rays have been extended to the Midwest by the United States public health service.

More than 200 women clock factory employees in the vicinity of New York already have been examined by scientific investigators of the service.

Using especially developed apparatus, the investigators have subjected each worker to a searching examination that is expected after X-ray plates have been developed to disclose the slightest trace of radium.

It will require several months, Dr. L. R. Thompson, who is directing the inquiry for the health service, said, to complete study of the plates obtained by the field workers and prepare the results of their study for publication.

The study is the most exhaustive ever undertaken to determine how radium rays affect workers who come into intimate contact with them. Five New Jersey women and a number of workers elsewhere have been stricken after exposure to radium rays in clock factories and several deaths have resulted.

Doctor Thompson explained the health service has decided to expand its inquiry to Illinois in order to obtain data that will be as complete as possible. Results of the survey are expected to be of invaluable aid to science in the future.

Women workers in clock factories whom the investigation discloses to be infected with the penetrating radium rays will be removed to other employment.

Results of the study are expected also to clarify the dispute between scientists over whether radium rays are harmful.

Mexican Slain in Fight Over Fifty Cent Fee

Tia Juana, Mex.—Fifty cents caused the slaying of Francisco Guzman, operator of a picnic park near here, the wounding of his wife and the severe beating of their three-month-old baby.

Two men and an attractive woman started to drive from the park without paying the usual 50 cent fee after being there several hours and drinking a keg of beer.

Guzman and one of the men came to blows in the resulting argument. While they were fighting, the second man shot Guzman to death and wounded his wife in the leg. The baby in Mrs. Guzman's arms was hit several times when the mother tried to force her way between the fighters.

The three, believed to be Americans, escaped over the border into California before the affray became known.

Vigilante Will Permit Robbers to Go Own Way

Fond du Lac, Wis.—The Fond du Lac vigilantes organization which protects banks from roving gangsters is short one member of its original quota.

When roll call was taken at the first mobilization and inspection, the absent member sent the following note to the commanding officer:

"My wife said I should leave guns alone and let bank robbers do their molesting, if any, without interference on my part. Furthermore, the good woman says that the place for a home loving husband is at home, not cavorting around the country looking for these bank robbers."

His resignation was accepted.

Chinese Counterfeiters Caught Making U. S. Coins

Peiping.—The Chinese police have discovered a gang of Chinese counterfeiters here who were engaged in manufacturing American gold coins. Four of the leaders have been arrested, and their apparatus confiscated. The police state that the counterfeit coins were not good enough to deceive Americans, but that a number of them had been passed successfully upon Chinese banks and exchange shops.

Life Insurance Popular

Ottawa, Ont. — Canadians carry more life insurance than any other people in the world with the single exception of residents of the United States. Approximately $650 worth of insurance is carried for every man, woman and child in the Dominion as against $750 per head of population in the United States.

Timber Wolf Becomes Pal of Michigan Man

Traverse City, Mich.—Mark Craw, Traverse City conservation officer, has successfully tamed a young timber wolf.

The wolf, taken by Craw while a pup and nursed from a bottle, answers his master's call like a dog, and follows him about the house. It eats meat from a platter, and is glad to accept the warmth and comfort of a pillow. Also, it is gentle in temperament.

Man has never been fortunate in his experiment with the wolf, and Craw is wondering whether his pet will prove the exception to the rule, or revert to type when it becomes older.

Chile Sets 5-Year Closed Season on Chinchillas

Santiago, Chile.—Hunting of chinchillas for a period of five years has been forbidden by the Chilean government in an effort to prevent complete extermination of the fur-bearing rodent.

The high price obtained for the fur during the last few years has resulted in a veritable war on the animal. The chinchilla is hunted principally by Indians living in the Andes highlands, who capture the animal with weasels.

At the same time the government forbade the killing of chinchillas, a governmental decree was issued establishing an annual bonus of $12 for every chinchilla raised domestically. Breeding farms for the animals will be established by the government to conserve and propagate the species.

YOU MUST COME TO DINNER

Gone are the days when Mrs. Newlywed dreads her first dinner party for the men folks. Biscuits and cakes, those traditional gambles of the amateur, hold no terrors for the modern bride, for, with self-rising flour at her right hand, Mrs. Newlywed is without fear and without reproach. And so is everything she cooks!

"You must come to dinner," she says, and come they must, these critical inlaws who dread this demonstration of amateur cuisine. The bride is calm at her debut. She's proud of her vegetable soup, and the cheese sticks she serves with it. Roasts are simpler and surer than any other meats and

Newlyweds Favor Honeymoon Cake and Paradise Pudding.

lamb was ever a standard treat at the in-law's home. So roast lamb it is, with mint jelly jolted in the refrigerator, and green peas.

Then comes that bane of life of every bride before the reign of self-rising flour—drop biscuits! With self-rising flour, however, all fear is gone, for the actual cooking is a matter of ten of the last minutes. The recipe is simply two cups of self-rising flour, two tablespoons of fat, and seven eighths of a cup of milk.

Dessert is easy for the happy bride, for the romantic pairing is obvious—Paradise Pudding and Honeymoon Cake. No terrors here! Follow these directions:

Honeymoon Cake.

¼ cup fat
¾ cup sugar
1 tsp. lemon extract
1½ cups self-rising flour
½ cup milk or orange juice
2 egg whites

Directions: Cream the fat; add the sugar; continue to cream until the sugar granules have dissolved; add the flavoring and flour alternately with the milk; fold in the egg whites, beaten stiff but not dry; pour into a greased and floured cake pan, and bake in a moderate oven about 30 minutes. Cool and spread the top and sides with orange frosting.

CENSUS TO PUT US IN GOLDFISH BOWL

Questions Will Leave No Secrets Unrevealed.

Washington.—How many women in America are working? How many families own radio sets? What percentage of household heads own their own homes? At what age are most persons married for the first time?

These are some of the questions that will be answered for the entire nation as a whole for the first time after completion of the 1930 census. Interrogations aimed to obtain the replies were included in a list of new questions to be asked by enumerators next April, announced by William M. Steuart, director of the census bureau.

Forms Basis of Advertising.

Most important of the new questions, in the opinion of Mr. Steuart, is that relating to home owning. The enumerators will find out from the head of each family the value of his home if owned, or the monthly rental if rented, thus making possible a classification of families according to buying power and furnishing a basis for selling and advertising campaigns.

The question on radio sets, according to Mr. Steuart, will tell radio station operators and advertisers just how large the potential radio audience is.

Women doing housework in their own homes will be designated in the 1930 census reports as "home makers." This designation will be entered in the family relationship column rather than in the occupation column, in order that women who follow a profession or other gainful occupation, in addition to being home makers, may properly be classified in respect to both lines of activity. This will reveal for the first time exactly how many women are working and to what extent.

For Two Purposes.

The question asking for the age at first marriage is intended to serve two purposes. First, it will give definite information as to the relative age at marriage of persons in different racial and economic groups; second, it will make possible a tabulation on the number of children in families of women who have been married a stated number of years.

"In the classification of gainful workers according to occupation and industry it is proposed to put much greater stress than heretofore on the returns for industry," Mr. Steuart said. "A special schedule for unemployment will contain a number of questions designed to separate those not working into several classes, including, besides those absolutely unemployed, those who have jobs for definite time being and those laid off without pay."

Taxidermist Brings Frozen Snake to Life

Colorado Springs, Colo.—Recently a heavy snowstorm swept over the Rocky mountains and a seven-foot boa constrictor in his steam-heated cage "froze to death." Spencer Penrose, the owner of the zoo at the foot of Cheyenne mountain, near here, visited the box in the afternoon and found him stretched out upon the huge limb of a tree, which is his favorite haunt in captivity.

The next morning a blizzard having intervened, the keeper found the boa frozen solid, and Mr. Penrose sent him to the taxidermist to be stuffed.

The taxidermist and his assistants rolled him out on the floor, seemingly a solid ice mass, while they sharpened their knives. As the taxidermist placed the point of his blade in the boa's head the snake opened his eyes. The man jumped. A quiver ran down the boa's coils, his tail swished forcefully from side to side. The attendants vanished and the boa has another life to lose.

New Map of Europe Uses 46 Languages

Washington.—The National Geographic society has just issued a new map of Europe in forty-six languages. The forty-six languages were required to give the precise official spellings of the place names in countries where the places exist.

In the years following the armistice one of the notable changes in Europe has been the development and intensification of natural feeling with respect to geographical place names. Warsaw is Warszawa to the Pole, Petrowar Revai has been replaced by Tallinn in Estonia; St. Petersburg was transformed into Petrograd, but now is Leningrad. So with hundreds of the names in the atlas, the changes, at present, have endured for centuries.

The traveler soon finds that Brussels, in Belgium, is Bruxelles; that Copenhagen is Kobenhavn; that Vienna is Wein, and Constantinople is Istanbul.

Brazilian Row Between Church and State Ends

Rio de Janeiro.—An agreement between the church and state was brought about in the state of Minas Geraes recently when D. Antonio Cabral, archbishop of Bello Horizante, handed a gold pen to the president of the state for him to use in the following decree:

"In educational establishments maintained by the government no religious instruction will in the future be permitted for a space of time not more than 50 minutes each day for three days of the week."

A SIX IN THE PRICE RANGE OF THE FOUR

The COACH

HYDRAULIC SHOCK ABSORBERS
Four Delco-Lovejoy hydraulic shock absorbers on all models eliminate road shocks and increase comfort.

90-HORSEPOWER MOTOR
A great six-cylinder motor, increased to 50 horsepower, gives smoother, quieter operation, with greater power.

BRONZE-BUSHED PISTONS
The stronger, lighter pistons are bushed with high-grade bronze to provide smoother operation and longer life.

NEW HOT-SPOT MANIFOLD
A larger hot-spot manifold insures complete vaporization of fuel—improving performance and efficiency.

STRONGER REAR AXLE
Larger and stronger rear axle gears—made of the finest nickel steel—add to durability and long life.

NEW ACCELERATION PUMP
A new automatic accelerator pump provides the flashing acceleration which modern traffic necessitates.

WEATHER-PROOF BRAKES
Fully-enclosed, internal-expanding, weather-proof brakes assure positive brake action at all times.

GASOLINE GAUGE ON DASH
The instrument panel carries a new grouping of the driving controls—including a gasoline gauge.

NON-GLARE WINDSHIELD
The new Fisher body non-glare windshield deflects the glare of approaching headlights.

LARGER BALLOON TIRES
New, larger, full-balloon tires with smaller wheels improve roadability, comfort and appearance.

TWO-BEAM HEADLAMPS
Two-beam headlamps controlled by a foot button permit courtesy, without dimming the lights.

ADJUSTABLE DRIVER'S SEAT
All closed models have an adjustable driver's seat—a turn of the regulator gives the proper position.

Supreme Court Judges

The Democratic caucus has a wide field in which to select judges for the highest judicial tribunal of the State last week, and while the election of Judge Hudgins and Judge Gregory is generally satisfactory to the people, there is some criticism made of the methods used to select for the bench. Judge Hudgins elevation makes a place on the circuit bench for Mr. Oslin, and in the case of Judge Gregory, the great southwest saved the day for him when it withdrew Judge Roberts in his favor. Judge Hudgins is a brother of our County Agent, and is highly esteemed in this section of the state. The vote given our own Judge Hutcheson was quite a compliment and deserved in every respect.

The members are to be congratulated on the calibre of the men selected and the life and property rights of the citizens of Virginia are safely entrusted to their final decisions.

Va. Tobacco Growers Told They Should Form Co-operative Body Now

Danville, January 17, (ap) —Now is the time for the tobacco farmers of Virginia to form a tobacco co-operative marketing association, James C. Stone, member of the federal farm board, representing tobacco, told a group of about 150 farmers at a public meeting in the auditorium of the Masonic temple here this afternoon. The public meeting for farmers was held following private conference with a committee of farmers named at a meeting of tobacco growers here on December 18. The public meeting was arranged with Mr. Stone as the speaker a short time after the committee meeting opened, and although little publicity had been arranged, a fair and representative gathering was in attendance.

"If farmers do not take steps in the near future to organize a marketing association, there will be little chance of them securing aid in marketing their 1930 crop," Mr. Stone said. "Farmers will first have to decide whether or not they desire aid and go about perfecting organization efficiently. The federal farm board cannot deal with the individual farmer and is only allowed to deal with cooperative marketing associations. Tobacco growers will never get anywhere until they increase their buying power, or concentrate their selling power into some central organization just as the large tobacco buying companies have done. At the present time tobacco buying interests have concentrated their buying power into five large companies, which are efficiently organized, and until the farmer also organizes, he will stand little chance of bettering his present condition."

Co-operative marketing is a good thing for the farmer, and is a good business proposition, the speaker told the gathering. Illustrations of 15 cotton co-operative marketing associations, which were merged into one large central agency, selling over one and one-half million bales of cotton during last year. Grain co-operative agencies, organizations of wool growers, cotton farmers, fruit and vegetable agencies were cited by Mr. Stone to show that the plan could prove successful if given the proper backing of the farmers.

All successful organizations are accomplished through co-operation, Mr. Stone said, and the main reason for the failure of the old tri-state organization in this section, was the unfaithfulness of its members, who refused to carry out their contracts with the agency. The difference between farming and industry is that when industry faces a crisis all concerned place their shoulders to the wheel and work to better conditions while farmers usually abandon a cause, when they see a difficulty arising.

Farmers should not seek a monopolistic control of tobacco marketing but should only want to be fair with the tobacco buying companies and to deal fairly for Mr. Oslin, and in the case of Judge Gregory, the great southwest saved the day for him when it withdrew Judge Roberts in his favor. Judge Hudgins is a brother of our County Agent, and is highly esteemed in this section of the state. The vote given our own Judge Hutcheson was quite a compliment and deserved in every respect.

The members are to be congratulated on the calibre of the men selected and the life and property rights of the citizens of Virginia are safely entrusted to their final decisions.
